a section of a map of Swinoujscie (Swinemuende) showing locations of Soviet installations along the Mellinfahrt (Mielinski) channel. The installation numbers in the following observations correspond to the numbering of these installations on the map.

2. On 24 May 1955, an MTB, armed with torpedo tubes, lay alongside the old naval quay (No. 1) and had one slung torpedo. The torpedo was about 4 to 5 meters long. On the quay lay floats for trawls, buoys, old torpedos and mines.
3. Near the newly built tanks (No. 2) there were numerous vents (air-inlets) which looked like small wooden chimneys with little roofs. These were about 0.5 m high and about 1x1 m wide. There were about 20 of these vents in the rectangle marked No. 3 on map.
4. In the rectangle marked No. 4 on map, pipes, about 20-25 cm in diameter and about 25 m long, were laid together as if in preparation for building. The pipes were white on the outside. Either this was insulating material or they were painted that color.
5. The newly constructed quay (No. 5) is about 400 m down the channel from the old quay.
6. On 11 June 1955 four tank cars stood on the railway line (No. 6) near the coast. Farther away from the quay there was a freight train with several tank cars.
7. The whole region, a distance of over a kilometer along the coast from the old quay to the new one, was guarded by Soviet army sentries. There were about 9 of them near the coast. Formerly not more than 2 sentries could be seen in this region.
